Experience

Systems Engineer

July 2025 – Present

RuDe Labs

Remote

- **Sigma Earth – AI ESG Platform:** Architected an AI-driven ESG reporting system using **React.js**, **TypeScript**, **Firebase**, and **Gemini API** which can generate 10+ ESG documents.
- **WAPS – Monitoring & Emergency Response Platform:** Designed a web portal with role-based workflows, managing users, clients, and monitoring centers. Engineered real-time emergency alert handling from mobile apps, enabling centralized monitoring and improved response visibility.
- **Influencer–Brand Platform:** Delivered a full-stack system using **Next.js**, **React Native**, **Supabase**, and **Meta API** for campaign workflows with 15+ fully responsive screens.
- **Cricket App:** Created a **React Native** app integrating APIs for real-time scores and player statistics.

Systems Engineer Trainee

Dec 2024 – June 2025

RuDe Labs

Remote

- **FinRaces:** Designed a real-time stock prediction platform using **React.js** with 10+ screens and more than 20 comparable metrics. Designed and integrated dashboards, leaderboards, and watchlists with live updates.
- **RuDe Labs Website:** Developed and deployed the official company website using **Next.js**, **Tailwind CSS**, and **Framer Motion**, showcasing projects, services, and team members.
- Enhanced user experience with responsive design, interactive animations, and performance optimizations, ensuring fast load times and modern UI/UX standards.

Technical Skills

Languages: JavaScript (ES6+), Python, C++, SQL, HTML/CSS

Frameworks: React.js, Next.js, Node.js, Express.js, React Native, Flask, Tailwind CSS

Tools & Platforms: Git, Docker, AWS, Firebase, Supabase

Projects

Quizmefy | *Next.js, Prisma, NextAuth, OpenAI API*

[Code](#)

- Engineered an AI-powered quiz platform generating quizzes from prompts using **OpenAI API**.
- Implemented authentication using **NextAuth** with **Prisma**-based schema design.

Spotify Clone | *Next.js, Supabase, PostgreSQL, Tailwind CSS*

[Code](#)

- Designed a music streaming platform supporting upload, playback, and search.
- Integrated Supabase authentication with secure login and recovery flows.

Learning Management System | *MongoDB, Express.js, React.js, Node.js*

[Code](#)

- Built a MERN LMS supporting course creation, enrollment, and progress tracking.
- Engineered REST APIs with JWT authentication and optimized MongoDB schema design.

Education

Chitkara University

B.E. Computer Science (CGPA: 9.72)

Rajpura, India

Aug 2020 – May 2024

Achievements

Top 10 Finalist – Google Octahacks 4.0

2023

- Built a food recommendation engine in a team of 4.

First Runner Up – SAP-AI Hackathon

2022

- Created an AI-based cryptocurrency trend analysis chatbot.
